 setup.py	version fix	2 years ago

 README.TXT

PyBrain -- the Python Machine Learning Library

=====

INSTALLATION

Quick answer: make sure you have SciPy installed, then
python setup.py install

Longer answer: (if the above was any trouble) we keep more detailed installation instructions (including those for the dependencies) up-to-date in a wiki at:
<http://wiki.github.com/pybrain/pybrain/installation>

DOCUMENTATION

Please read
docs/documentation.pdf
or browse
docs/html/*
featuring: quickstart, tutorials, API, etc.

If you have matplotlib, the scripts in `examples/*` may be instructive as well.
