栏目 Linux (http://www.voidcn.com/column/linux)

原文 http://blog.csdn.net/u010648159/article/details/52387041

安装genymotion的时候出现以下错误，本人环境是ubuntu14.04

```
./genymotion: /usr/lib/x86_64-linux-gnu/libstdc++.so.6: version `CXXABI_1.3.8' not found (required by
/home/wuxiaojun/developmenttoos/genymotion/genymotion/libQt5Core.so.5)
./genymotion: /usr/lib/x86_64-linux-gnu/libstdc++.so.6: version `GLIBCXX_3.4.20' not found (required by
/home/wuxiaojun/developmenttoos/genymotion/genymotion/libQt5WebKit.so.5)
./genymotion: /usr/lib/x86_64-linux-gnu/libstdc++.so.6: version `CXXABI_1.3.8' not found (required by
/home/wuxiaojun/developmenttoos/genymotion/genymotion/libcui18n.so.52)
./genymotion: /usr/lib/x86_64-linux-gnu/libstdc++.so.6: version `CXXABI_1.3.8' not found (required by
/home/wuxiaojun/developmenttoos/genymotion/genymotion/libicuuc.so.52)
./genymotion: /usr/lib/x86_64-linux-gnu/libstdc++.so.6: version `GLIBCXX_3.4.20' not found (required by
/home/wuxiaojun/developmenttoos/genymotion/genymotion/libQt5Qml.so.5)
```

解决上面的方法是五步

```
LD_LIBRARY_PATH=/usr/local/lib64:$LD_LIBRARY_PATH export LD_LIBRARY_PATH sudo add
-apt-repository ppa:ubuntu-toolchain-r/test sudo apt-get update sudo apt-get insta
ll gcc-4.9 g++-4.9
```

依次执行即可
