 <b>RiweiChen</b> fix face detection bugs	Latest commit 36717f1 on 11 Sep 2016
 <a href="#">FaceAge</a>	add new model 11 months ago
 <a href="#">FaceAlignment</a>	open source more model 11 months ago
 <a href="#">FaceAttractive/try1_2</a>	add new model 11 months ago
 <a href="#">FaceDataset</a>	Update readme.md a year ago
 <a href="#">FaceDetection</a>	fix face detection bugs 10 months ago
 <a href="#">FaceExpression/FER</a>	add new model 11 months ago
 <a href="#">FaceGender</a>	add new model 11 months ago
 <a href="#">FaceProcessing</a>	add new model 11 months ago
 <a href="#">FaceRecongnition</a>	open source more model 11 months ago
 <a href="#">FaceSmile</a>	add new model 11 months ago
 <a href="#">resource</a>	open source more model 11 months ago
 <a href="#">util</a>	add new model 11 months ago
 <a href="#">.gitignore</a>	add new model 11 months ago
 <a href="#">README.md</a>	change a year ago
 <a href="#">README_ch.md</a>	Create README_ch.md a year ago

# DeepFace

a deep face analysis implement, mainly based on -[Caffe](#). At this time, face analysis tasks like detection, alignment and recognition have been done. -[中文Readme](#)

Each task is divide by different folder.

## ##Face detection

###baseline Face detection using sliding windows style, it first train a face/noface two class classification network, and then tranform to a full convolution network, detection is based on the heatmap when input a large full size image.

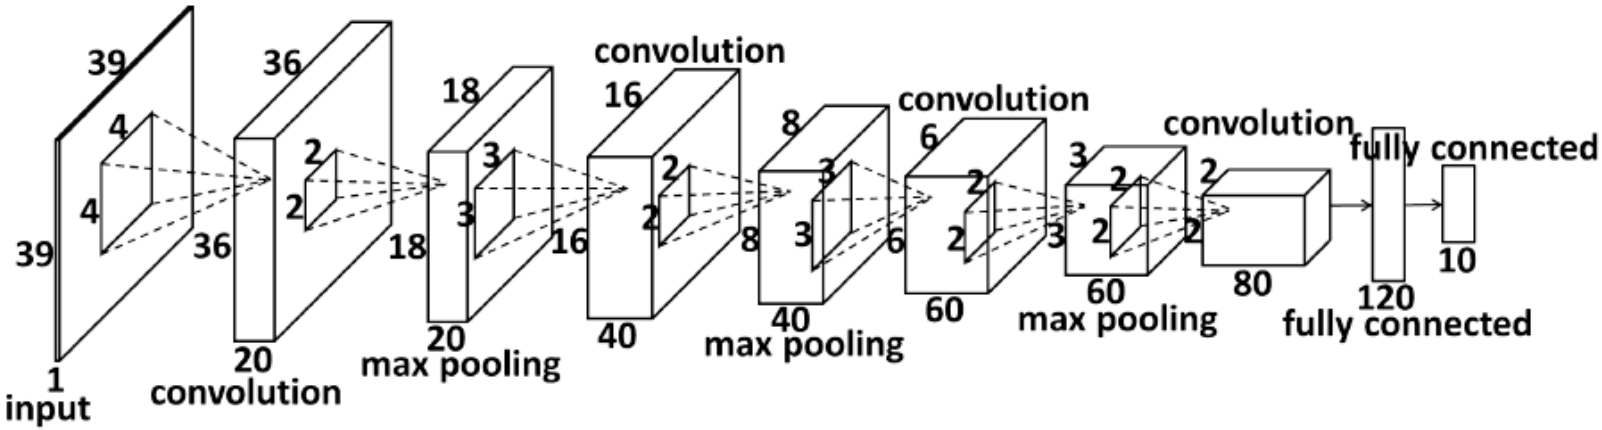

face detection result example :

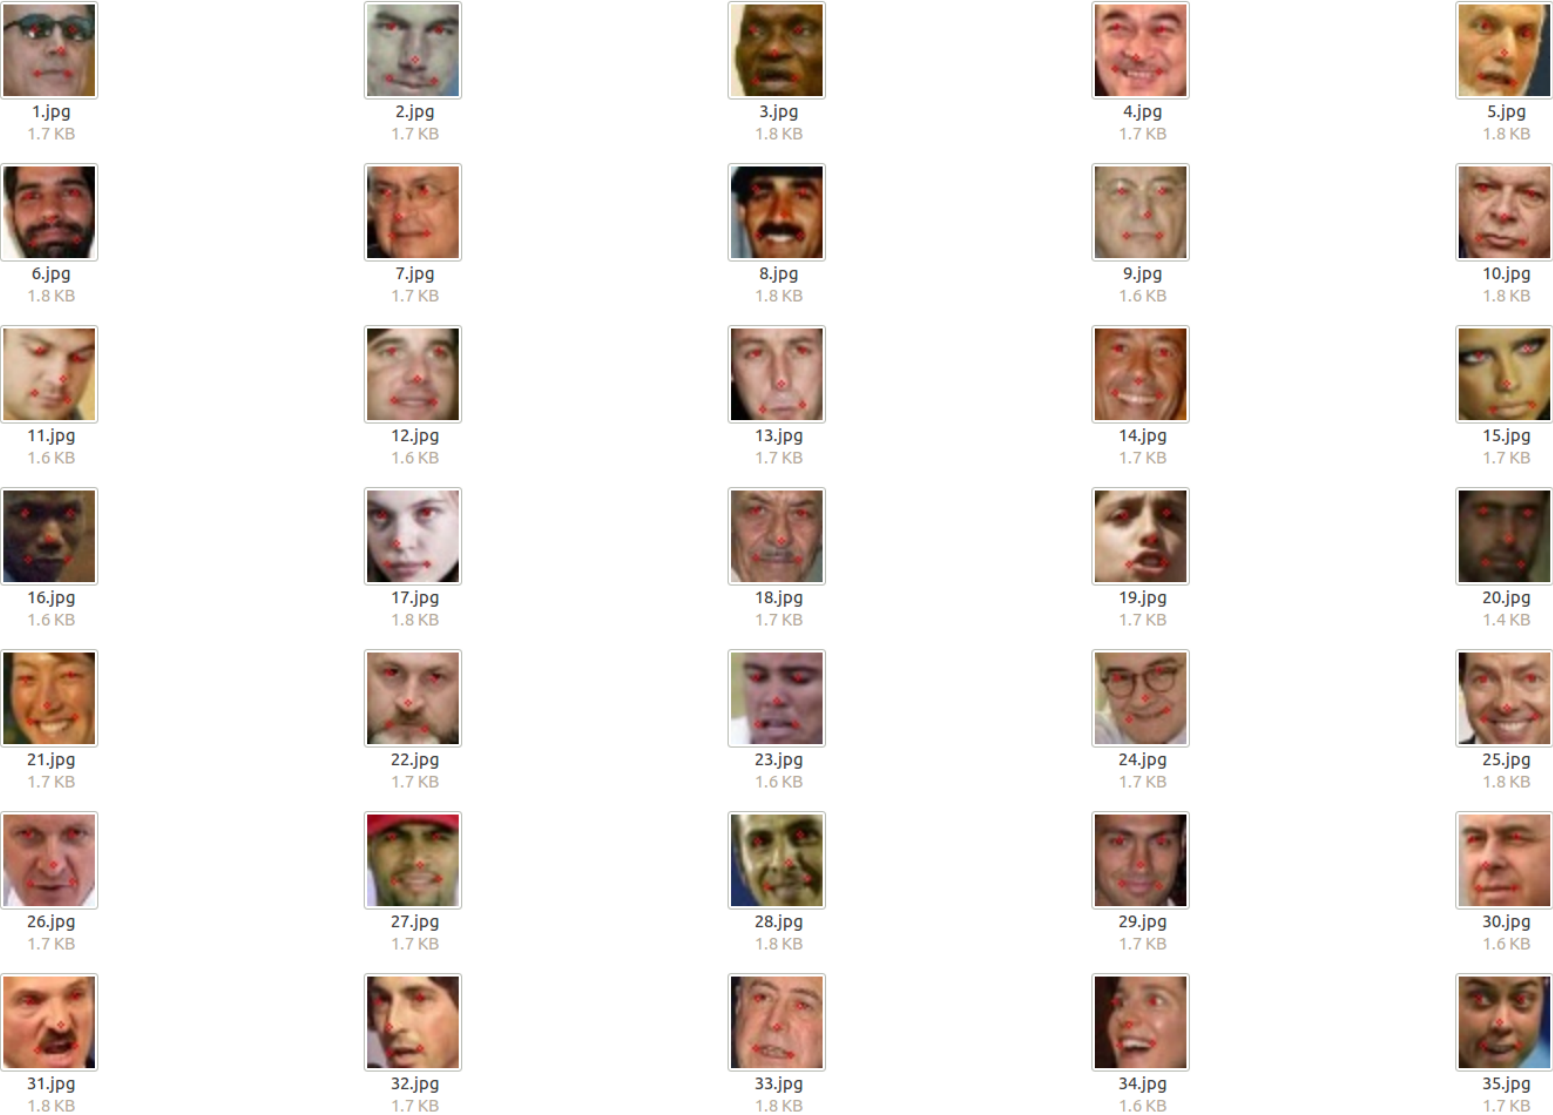

##Face key points detection

###try1\_1 face 5 key points detection using DeepID architecture.

Deep CNN F1

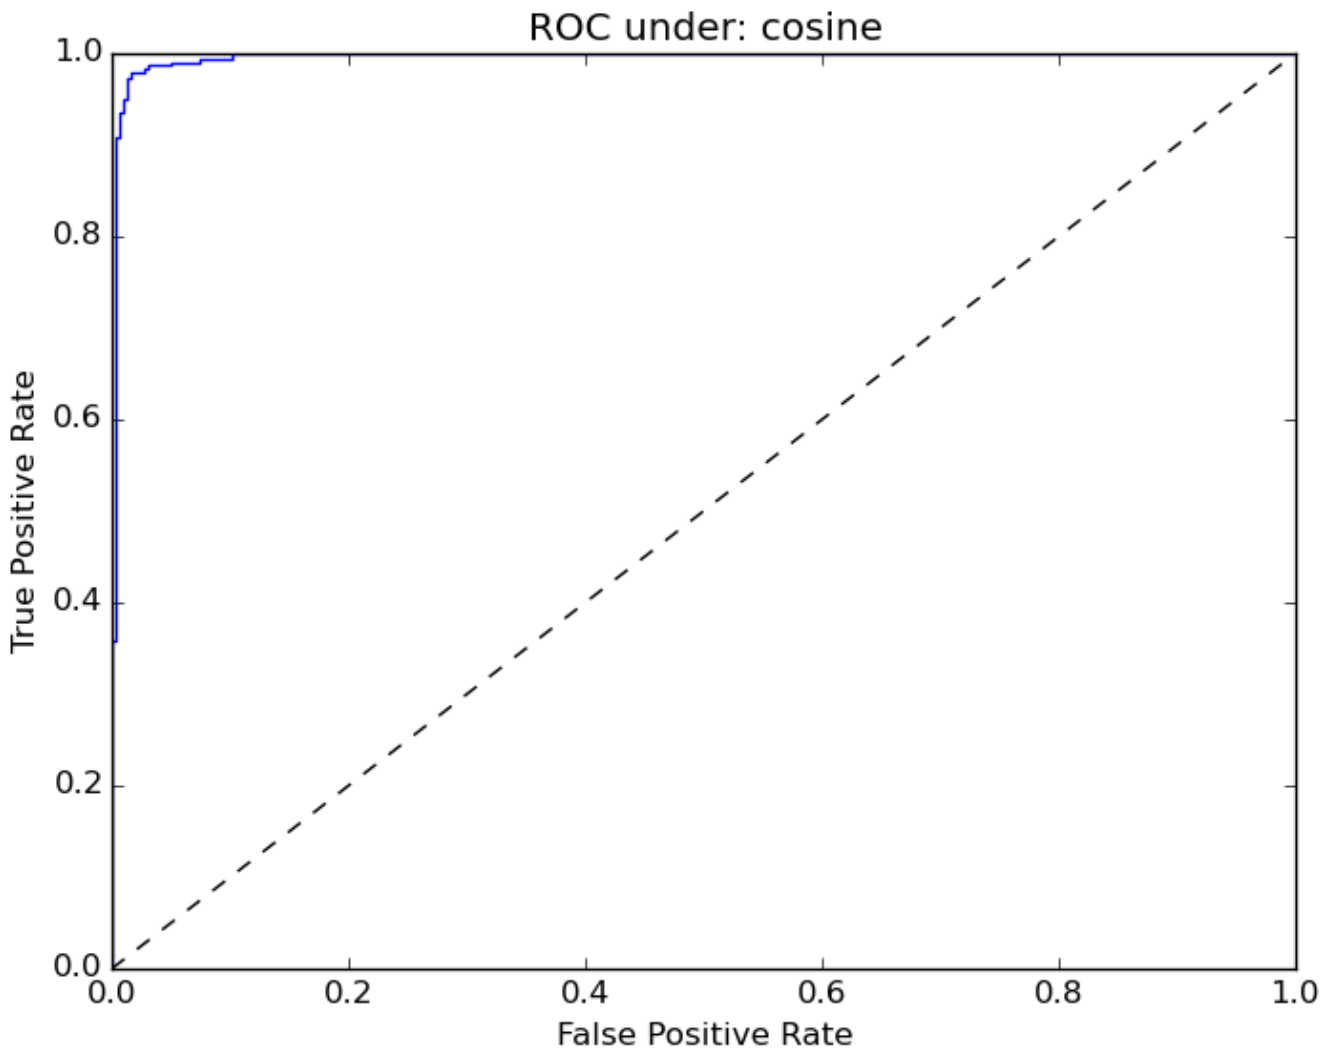

face 5 key points detection result example :

##Face Verification ###deepid Face verification based on DeeplD network architecture.

face verification ROC result :

##Face Dataset

We collect the face datasets usually used by recently years' paper, and divide by different task. Also we simply describe each of the dataset.(In Chinese)

For more implement details, please reference my blog
